Subject Index 1975-2014: Nos 1 to 42

This index consolidates and updates the Subject Index to the Journal of the Historical Society of South Australia Nos 1 - 20 (1974 [sic] - 1992) which appeared in the 1993 Journal and its successors for Nos 21 - 25 (1998 Journal) and 26 - 30 (2003 Journal). In the latter index new headings for Gardens, Forestry, Place Names and Utilities were added and some associated reindexing of the entire index database was therefore undertaken. The indexing of a few other entries was also improved, as has occurred with this latest updating, in which Heritage Conservation and Imperial Relations are new headings while Death Rituals has been subsumed into Folklife.

The index has certain limitations of design. It uses a limited number of, and in many instances relatively broad, subject headings. It indexes only the main subjects of each article, judged primarily from the title, and does not index the contents – although Biography and Places have subheadings. Authors and titles are not separately indexed, but they do comprise separate fields in the index database. Hence author and title indexes could be included in future published indexes if required.

Titles are cited as they appear at the head of each article. Occasionally a note in square brackets has been added to clarify or amplify a title. The following items are excluded: Presidents reports on the Societys activities, book reviews (but not review articles) and advertisements.

Within each subject items are arranged alphabetically by author and by title when there is more than one article by the same author. There are two exceptions. Within the subject Biography items are indexed by the subjects surname and collective biographies are grouped at the beginning. Within the subject Places general and regional items are found at the beginning with other items indexed by specific place names.

**Bold numerals** indicate Journal volume number.
