**Imperial/Metric Conversions (approximate)**

1 ton = 1.02 tonnes

1 mile = 1.6 kilometres

1 yard = 0.9 metres

1 foot = 30 centimetres

1 inch = 2.54 centimetres

1 acre = 0.4 hectares

In the old currency, there were 20 shillings (s) in a pound (£) and 12 pence (d) in a shilling. No reliable conversion rate of pounds into dollars can be given, except for 1966, at the introduction of decimal currency, when one pound equalled two dollars.
